Other ultrasound images:	from 36,00	<input type="checkbox"/>
Other examinations:		<input type="checkbox"/>

**General notes**

This examination serves as a statement of the health condition of the horse at the time of the examination. Stereotypies (vices) like weaving or crib biting, housing dependent chronic bronchitis, allergies and specific diseases of the upper airway tract that are only reckonable after intensive exercise cannot be assessed. The examination does not include assessment of these disorders. The examination gives no predictions regarding the conformation of the horse nor does it evaluate how the conformation might influence the breeding or equestrian career of the horse.

It is understood and agreed that the results of the examination may be discussed with the vendor/owner and purchaser of the horse but will not be disclosed to any other third party. However, the client of any particular examination case may at his or her discretion decide not to allow disclosure of the results to any other party, including the vendor/owner.

The assessment of the obtained findings is done with the greatest possible care by the examining veterinarian and reflects his or her opinion. A prediction of the future development of the health status, performance and application cannot be determined, because we are dealing with a living animal whose constitution and condition are constantly changing and developing. The decision about the purchase or sale can only be taken by the client.

**E. Additional examinations**

Radiographs, \_\_\_\_ images                       No radiographs

Other examinations:

**Assessment of the examination results**

- During today's examination I did not find any significant health abnormalities.
- During today's examination I found the horse to have the following health abnormalities:

1.
2.
3.
4.
5.
6.

- The mentioned findings (nr: \_\_\_\_\_) do not have a significant clinical relevance. Based on today's examination the purchase of the horse is of minimal risk.
- The mentioned findings (nr : \_\_\_\_\_) may have a significant clinical relevance. Based on today's examination the purchase of the horse is of medium risk.
- The mentioned findings (nr : \_\_\_\_\_) have a significant clinical relevance. Based on today's examination the purchase of the horse is of higher than medium risk.
- For a final medical assesment further examinations are needed: \_\_\_\_\_
